

ACCESS CONTROL

Improved
Physical
Security.

Key Control.

Premises
Traffic
Management.

Time and
Attendance.

Concerned about employees accidentally leaving doors unlocked or ajar? Have keys been lost or not returned? What are the expenses involved in re-coring locks or re-keying an entire building? Is your business of a sensitive nature where you need to know when and where people are within your facility? Is it necessary to limit access to only authorized personnel in restricted areas?

Secant Technologies understands the gravity of these concerns. We now offer access control solutions to help regulate the flow of traffic into and within your building, limit liability and better protect employees, company property and assets. These are innovative, affordable alternatives that deliver a rapid and appropriate response to crimes or emergencies when they occur.

An access control system is a state-of-the-art electronic security measure that provides a flexible level of security to meet your ever-changing needs. The system employs easy-to-use proximity technology. Employees are assigned a unique credential which is tracked throughout the system. Every use, or attempted use, logs to an event file that provides a comprehensive record of activity system wide. Data gathered in this fashion is admissible in court. The system allows easy integration of photo identification credentials, biometric identification devices, visitor management systems, intrusion detection and video surveillance systems.

Join the growing number of organizations that are taking control of their facilities by implementing access control systems as part of their overall physical security plan.

Benefits:

- Scalable solutions that grow with your needs
- Integrated video badge creation for easy employee identification
- Compatible with over 190 different card and reader formats
- Easy-to-use proximity technology, including "hands free" operation
- Schedule access by door and time of day for improved physical security
- IP network compatible system communication connects multiple sites for easy centralized control
- Reduce dependence on keys or eliminate them altogether for reduced costs
- Collect time and attendance data documenting employee access

Call Secant today at **269-375-8996** for a hands-on demonstration and facility access control survey.
