

STRUCTURED CABLING

Experienced.
Organized.
Particular.

Data transport speeds are increasing. Network uptime directly impacts productivity. Voice, video and data all traverse the same network infrastructure. Is your cabling infrastructure designed and installed to support your increased reliance on your network?

Secant's Structured Premise Cabling Group is ready to assist you with this infrastructure. We design and construct cabling systems that meet BICSI specifications, that are designed to fit your current and future needs, and that give you the solid foundation that is required to support your network devices. Secant is certified to install product from multiple manufacturers and can offer warranties up to 15 years on these installations.
